Department of Economics, University of California, Riverside

dwang177@ucr.edu | (951) 231-0895 | dingliwang.github.io

## Placement Director

Joseph Cummins

(951) 827-1582   joseph.cummins@ucr.edu

## Placement Coordinator

Gary Kuzas

(951) 827-1474   gary.kuzas@ucr.edu

## EDUCATION

---

**University of California, Riverside** — Ph.D. in Economics

Expected June 2027

Dissertation committee: Tae-Hwy Lee (Chair), Donggyu Kim, Ruoyao Shi.

**Boston University** — M.A. in Economics

2020

**Tianjin University of Finance and Economics** — B.S. in Economic Statistics

2018

## RESEARCH FIELDS

---

Econometrics; Forecasting; Machine Learning and AI in Economics

## RESEARCH PAPERS

---

### **Robust Replacement of Human Decision Makers under Distribution Shift**

*Job Market Paper*

*Revise and resubmit, Journal of Econometrics*

I study when an algorithm should replace a human decision maker if the deployment environment differs from the training environment. A distributionally robust ROC framework compares classification performance across a set of possible deployment distributions and examines the consequences of uncertainty for replacement decisions.

### **Median-Anchored Adjustment of Joint VaR-ES Forecasts** with Tae-Hwy Lee

*Under review, Journal of Business & Economic Statistics*

A one-parameter adjustment to existing tail-risk forecasts that rescales their distances from the fitted median, preserves VaR-ES ordering, and has a closed-form spread-weighted quantile estimator.

### **Adversarial Density Forecast for Macro-financial Risks** with Tae-Hwy Lee

An anchored conditional Wasserstein generative model for density forecasting in short macroeconomic samples, with theory and evidence on distributional accuracy and sensitivity to training randomness.

### **When Should Forecasts Be Equally Weighted? Signal Recovery and Estimation Costs**

A comparison of equal and estimated forecast weights that separates recovered predictive signal from estimation costs, accounts for tuning and component estimation, and uses past out-of-sample losses to guide the choice.

TEACHING EXPERIENCE

---

*University of California, Riverside***Instructor**

|                                                  |             |
|--------------------------------------------------|-------------|
| Statistics Camp (Ph.D.)                          | Summer 2026 |
| ECON 182 — Trade, Globalization, and Development | Summer 2026 |
| ECON/BUS 178 — International Trade               | Summer 2025 |

**Teaching Assistant**

|                                             |                     |
|---------------------------------------------|---------------------|
| ECON 205A — Econometric Methods I (Ph.D.)   | Fall 2026           |
| ECON 205C — Econometric Methods III (Ph.D.) | Spring 2026         |
| ECON 107 — Introductory Econometrics I      | Spring 2025         |
| ECON 101 — Statistics for Economics         | 2023–2026 (8 terms) |
| ECON 003 — Introduction to Microeconomics   | Winter 2023         |
| ECON 002 — Introduction to Macroeconomics   | 2022–2024 (4 terms) |

CONFERENCE PRESENTATIONS AND SEMINARS

---

|                                                                   |               |
|-------------------------------------------------------------------|---------------|
| Midwest Econometrics Group (MEG), Cincinnati                      | October 2026  |
| International Association for Applied Econometrics (IAAE), Lisbon | June 2026     |
| Asian Meeting of the Econometric Society (AMES), Hong Kong        | June 2026     |
| Econometrics Seminar, UC Riverside                                | November 2026 |
| Econometrics Seminar, UC Riverside                                | April 2026    |

FELLOWSHIPS AND AWARDS

---

|                                                                              |           |
|------------------------------------------------------------------------------|-----------|
| Outstanding Teaching Assistant Award, University of California, Riverside    | 2026      |
| Dean's Distinguished Fellowship, University of California, Riverside         | 2021–2026 |
| High Pass, Ph.D. Qualifying Examination, University of California, Riverside | 2022      |
| First Prize, Contemporary Undergraduate Mathematical Contest in Modeling     | 2016      |

COMPUTING AND LANGUAGES

---

**Computing:** Python, R, Stata, EViews,  $\text{\LaTeX}$ **Languages:** English (fluent); Mandarin Chinese (native)REFERENCES
